

PATENT

Docket No.: 33677-0001

7  
Linda  
8/6/03**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant(s) : Gary S. Borodic, M.D.  
Serial No. : 10/040,830 Group Art Unit: 1645  
Filed : January 8, 2002 Examiner: Patricia A. Duffy, Ph.D.  
For : *The Use of Botulinum Toxin for the Treatment of  
Chronic Facial Pain*

**RESPONSE TO RESTRICTION REQUIREMENT****BY FACSIMILE**

(703) 308-4242

ATTN: Patricia A. Duffy, Ph.D.

In response to Examiner's Restriction Requirement mailed June 24, 2003,  
Applicant provisionally elects to pursue prosecution of Invention I as termed by the Examiner.  
This election is made without traverse.

As per the Examiner's request, the Applicant further elects to pursue prosecution  
of trigeminal neuralgia, Species 1 of Group I, and the immunotype botulinum A toxin, Species 2  
of Group I. The election of trigeminal neuralgia is made without traverse. However, the election  
of immunotype botulinum A toxin is made with traverse.

Referring to the immunotype, the initial experimentation of this invention was  
performed with type botulinum A toxin, the elected species. (See Specification of Application,  
"Detailed Description", p. 4). However, there is a high probability of effectiveness with other  
immunotypes, including immunotypes A-G as specified in claim 11. For the foregoing reasons,  
it is respectfully submitted that this restriction requirement should be withdrawn.

No fee or extension of time is believed due in connection with this response and  
submission. However, in the event that it is determined that an extension of time or additional
